**Re: Notice of *Ex Parte* Presentation in Revision of Part 15 of the Commission's Rules Regarding
Ultra-Wideband Transmission Systems (Docket No. 98-153)**

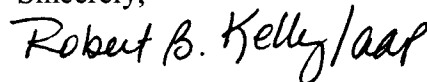

Dear Secretary Dortch:

Pursuant to Section 1.1206(b) of the Commission's Rules, 47 CFR § 1.1206(b), notice is hereby provided in the above-referenced dockets regarding an *ex parte* presentation made to John Reed and Karen Rackley, Office of Engineering and Technology, by Delphi Corporation ("Delphi") on March 31, 2004. Participating on behalf of Delphi were Stephen Alland, Manager, Advanced Radar Systems Department and Nicholas Morenc, a consultant to Delphi (and former Manager, Advanced Systems Radar Department).

Delphi is the leading U.S. developer of vehicular radar systems that operate the 17 GHz, 22-29 GHz and 76-77 GHz bands. The parties addressed the matters in Delphi's Ex Parte Comments in this proceeding submitted on March 25, 2004. The parties also discussed the benefits of the change of the peak average power requirements for non-UWB devices for the production of short range automotive radars in the 16.2 to 17.7 GHz band.

Please do not hesitate to contact me if there are any questions regarding this submission. A copy of this notice is being provided to the Commission staff named above via first class mail.

Sincerely,

Robert B. Kelly

cc: John Reed, Office of Engineering and Technology
Karen Rackley, Office of Engineering and Technology
